
Subject: Patch request for SplitterFrame

Posted by [mrjt](#) on Fri, 05 Oct 2007 10:19:29 GMT

[View Forum Message](#) <> [Reply to Message](#)

I have modified my SplitterFrame to allow Hide/Show behaviour. Previously it was impossible to prevent the user from dragging a SplitterFrame (even with SetSize(0) the resize bar would be available) and the methods were hidden by private inheritance.

I've tested the changes quite thoroughly and I would be grateful if they could be added to CtrlLib.

Cheers,
James
