Subject: Re: Patch request for SplitterFrame
Posted by mirek on Sat, 06 Oct 2007 16:13:18 GMT

mrjt wrote on Fri, 05 October 2007 06:19I have modified my SplitterFrame to allow Hide/Show behaviour. Previously it was impossible to prevent the user from dragging a SplitterFrame (even with SetSize(0) the resize bar would be available) and the methods were hidden by private inheritance.

I've tested the changes quite thoroughly and I would be grateful if they could be added to CtrlLib.

Cheers,
James

Thank you, patch applied.

Mirek
