---

Hello all,

I am just wondering if there are any plans to do minor (and bug fix) releases of UPP. I am currently using 2007.1, and have patched the libraries because of this:

<http://www.ultimatepp.org/forum/index.php?t=msg&goto=8596> (crash when compiling in anything other than debug) and this:

<http://www.ultimatepp.org/forum/index.php?t=msg&goto=8292> (crash when non-number is entered into EditInt).

Sorry if I have missed this somewhere else.

By the way, ultimate++ is absolutely wonderful! i can't even count the amount of time that it has saved me.
