iplyfast wrote on Thu, 23 February 2006 12:59 There are two source trees at sourceforge cvs, uppsrc and upp (which contains a directory called uppsrc).

These directories don't actually look like they contain the beta software.

Are you folks using the cvs? (I wish you would, then I might be able to contribute in a meaningful way). If you are, what is the directory to use?

Unfortunately not. The the time, CVS was feeded during snapshot releases, but that did not happened for some time now.

To obtain fresh sources, download latest src package from files (there are always fresh sources each week).

If find a bug or add a feature, post patch to the forum (do not bother with .diff, just post altered file - we will review changes before applying anyway).

Mirek
