Alas, rebuilding did not help. (Really only needed to change /usr/X11R6/ to /usr/X11/

Most likely all the repainting bugs are due to

X Error: BadMatch (invalid parameter attributes), request: X_CopyArea, resource
id: 2100151 = 200BB7
X Error: BadMatch (invalid parameter attributes), resource id: 0 = 0
X Error: RenderBadPicture (invalid Picture parameter), resource id: 2210914 = 21
BC62
X Error: RenderBadPicture (invalid Picture parameter), resource id: 2210914 = 21
BC62

Which is an endless list of those lines repeated.

I do not know what to do here.
