I would like to too, but if you are going to develop GUI toolkit, you have to be tough... Smile

ehehehehe... I'd don't like to be in your place, now

Well, the expense is a little bit bigger than "small" too...

Reference counting means atomic increments and decrements with unstable conditions. These are very expensive to be called for each mutating operation...

mhhhhhhh.... I'm not so sure about it. When I have a bit more time, I'll try to rewrite Array class using refcounts, so we can make some test about it. I find the matter very interesting.

Ciao

Max
