Subject: missing library - linking error

I'm compiling a simple program and I'm using a time variable.
I'm including <time.h> because I want to use the clock_gettime() function to retrieve the system time clock.
The only think I get back it's a linking error reported below:

Linking...
/home/user/upp/out/CodaArtigianale/GCC.Debug.Gui.Main.Mt.Shared/CodaArtigianale.o: In function `MS_CodaArtig::funzione_suo()':
CodaArtigianale.cpp:(.text+0x49): undefined reference to `clock_gettime'
collect2: ld returned 1 exit status

There were errors. (0:04.00)

Can someone say to me which library I have to include in my project?
