Good bug!

When drawing percentages the progress bar falls back to none-chameleon drawing style and the function GetMsz() used for returning the inner control size (minus margins) returns an incorrect value because it still uses ChMargin.

My quick fix:

```
Size ProgressIndicator::GetMsz()
{
    Size sz = GetSize();
    if (GUI_GlobalStyle() >= GUISTYLE_XP && !percent) {
        Rect mg = ChMargins(style->hlook);
        sz.cx -= mg.left + mg.right;
        mg = ChMargins(style->vlook);
        sz.cy -= mg.top + mg.bottom;
    }
    else {
        sz.cx -= 4;
        sz.cy -= 4;
    }
    return sz;
}
```

James
