Tom1 wrote on Fri, 09 November 2007 05:41 I do not use SetLanguage. Should I? In my Windows installation the active system locale is Finnish. Or should I separately define locale for Upp somehow?

As for <MM> format, I do not have a strong opinion about this, but for me a number would be enough. It may be easier for people who do not speak english natively, but still need to access this widget on a system with English interface language.

Actually, I used already the SwapYearMonth..

Thanks,

Tom

Finish is not supported yet. Awaits somebody to do translations..

([http://www.ultimatepp.org/srcdoc\\$Core\\$18n\\$en-us.html](http://www.ultimatepp.org/srcdoc$Core$18n$en-us.html), also search the forum for details).

You can also set the date formatting regardless of current language settings using

```
void SetDateFormat(const char *fmt);
```
