I have a problem when I try to use 3 arguments

see my source:

```
private:
VectorMap<String, String> mHostList;

Hosts::Hosts()
{
mHostList.Clear();

FileIn fs;
if (fs.Open(".\\whls.cfg")) {
while (!fs.IsEof()) {
String line = fs.GetLine();

int pos = line.Find(';');
int pos1 = line.Find(';', pos + 1);
int pos2 = line.Find(';', pos1 - 1);

if (pos > 0 && pos1 > 0 && pos2 > 0) {
String id = line.Left(pos);

String ipAddr = line.Mid(pos + 1, pos1 - pos - 1);

String port = line.Right(line.GetLength() - pos2 - 1);

[B]mHostList.Add(id, ipAddr, port);[/B] // error here !!!

}
}
fs.Close();
}
}
```

That appears error:

C:\MyApps\MyApplication\hosts.cpp(27) : error C2661: 'AMap<K,T,V,HashFn>::Add' : no overloaded functi

on takes 3 arguments

with

[

K=String,

T=String,

V=Vector<String>,

HashFn=StdHash<String>

]

MyAplication: 1 file(s) built in (0:03.31), 3313 msec / file, duration = 3438 msec

help me plz

ps: Sorry for my English...
