luzr wrote on Thu, 09 November 2006 20:40BTW, what is the U++ version? The listing looks like 605 (because there were stupid bug - verbose mode not working for compiler commands).

Can you check with latest dev?

Mirek

I had this exact error in 2007.1 (2007-04-10 21:53).

I tried downloading 711-dev2 on top of the 2007.1 source, cleaned UPPOUT, cleaned package, rebuilt for OPTIM and still had the same problems.

The IDE builds and links all packages okay except the ones in MyApp. For some reason, when compiling in MyApp, we are missing the double-quotes around the path/file names. This happens in MSC8.

It's unclear what it is in the setup that is causing problems.

When I tried 2007.1 a few months ago with MSC8, it worked great at home and at work. Since then, the machine at work has been rebuilt so I've had VS reinstalled. Now, I'm having these problems on the compile line.

Any help would be greatly appreciated.

Regards,  
Ken
