Subject: ArrayCtrl with labels / layouts inside ?
Posted by jiaif on Sun, 25 Nov 2007 18:23:11 GMT

Hi,

I'm new to Upp and i'm doing tests.
I dunno if its possible but i'd like to have an array control filled with labels.

My app have a main layout called myFirstUppApp with an ArrayCtrl called testArray.
I made a second layout with a label containing 3 others labels.

I want to use this second layout as a widget to fill my testArray.

Is it posible ? How can i do it, i'm lost

jf
