I can make a screenshot if you want to see, it's like an empty label who appears.

Yes, It would be helpful. Also, please upload a simple example if you could. It's better to examine the problem on a source code.

One more question, how to add a layout to an array ?
Is it possible ? What's the way to follow ?

AFAIK, "theoretically" it is possible, but not with the current "CtrlLib.usc" (layout editor, ctrl "drawing" file) I suppose; for, it has to be modified first.

Actually, It might be a good idea...
