hi Nick, no, it not that ..

1) firstly   ....   i am using a .lay file (hence there are a few controls like edit box and buttons) (sorry, it was included in .h file) so a layout is required.

2) I still tried commenting   " CtrlLayout(*this, "Window title"); ", but ...
---------a) there was no change in the mentioned behavior.
---------b) as expected the controls in .lay disappeared.

...thanks anyways

 ... i think James might be right i'll try that and get back

 .... ok Back ... good news, got it working, see the next message ..
