unodgs wrote on Wed, 05 December 2007 11:51Ok, I run Core06 and this is what I've got:

```
a.Is<int>() = true
a.Is<double>() = false
b.Is<double>() = true
```

seem to be ok. I used MSC80

I'm getting

```
a.Is<int>() = false
a.Is<double>() = false // actually, this is ok!
b.Is<double>() = false
```

when using gcc 4.2.1
