use 7zip instead to gain better ratio.

<http://www.7-zip.org/sdk.html>

Licenses (quote from the link above):

"

LZMA SDK is available under any of the following licenses:

1. GNU Lesser General Public License (GNU LGPL)
2. Common Public License (CPL)
3. Simplified license for unmodified code (read SPECIAL EXCEPTION)
4. Proprietary license

"

IMHO GNU LPGL is well suitable for installer?
