unodgs wrote on Sun, 23 December 2007 00:07Here it is - new 712-dev1. I know we (I) still have a problem with regular (weekly) releases. Unfortunately my time was very limited lately - fortunately mdelfede started frequently svn updates so if you want to check out new upp code ASAP just use svn. Thanks mdelfede for doing that. I wish everyone merry christmas and the fantastic new year!

Thank to you all for this great work !
And merry Christmas too !

Bazaar is now part of release (it contains experimental docking system for now)

Are you updating svn bazaar ? that would be great !

Ciao

Max
