Subject: sqlite.sch syntax with multiple tables Posted by wilho on Mon, 27 Feb 2006 22:20:34 GMT View Forum Message <> Reply to Message

I'd be gratefull if someone could give me an example of sch -file with multiple tables specified. Seems that I can't create one properly.

TABLE_(SIMPLE_TEST1) INT_ (ID) PRIMARY_KEY STRING_ (NAME, 200) STRING_ (LASTNAME, 200) INT_ (BDATE) END_TABLE TABLE_(SIMPLE_TEST2) INT_ (ID) PRIMARY_KEY STRING_ (NAME, 200) STRING_ (LASTNAME, 200) INT_ (BDATE) END_TABLE

won't work
