Wiki is ok but he need a maintainer if we want to improve it an make a it veritable helper for Upp project. phirox offered his help in maintaining wiki, and i believe it is not too hard giving him a try, see what he can do. The decision is your. Or if this project don't really need the wiki you may consider removing the link from first page(however it is still indexed by google-bot, if you not remove it complete).

OK, what kind of access admin needs?

Mirek

Add user to "sysop" and "bureaucrat" groups(with phpMyAdmin or directly in mysql console).

INSERT INTO user_groups (ug_user, ug_group) VALUES ('1', 'bureaucrat');
INSERT INTO user_groups (ug_user, ug_group) VALUES ('1', 'sysop');

1 is the user_id(field from user table from wikidb)
replace 1 with desired user id
Doing that to an user, he will be able in future to delete and protect pages, block users and managing others users rights.

To stop anonymous user to post or edit, you must add these two lines to "LocalSettings.php"(you may edit this file by yourself [just webmaster have acces to it   ]):

$wgGroupPermissions['*']['edit'] = false; #anonymous users cannot edit pages
$wgGroupPermissions['*']['createpage'] = false; #anonymous users cannot create pages

I've just installed wiki on my PC and now I'm learning how to be an MediaWiki Hacker   . If you need help with wiki, i can help too.
