I forgot to say how you change the wiki logo.

Add this line to "LocalSettings.php":

```
$wgLogo="/path/to/logo.*(png,jpg,etc)";  
// $wgLogo="{ $wgUploadPath}/logo.jpg"; - image from images folder
```

The logo is expected to be 135px square.

Seems that wiki isn't so old (released on 2007-02-20).

WikiVersion

Result:

Logo and user rights:
