From HomeBudget:

```
SQL & ::Select(NAME, SqlId("sum(value) as val"))
    .From(MONEY, CATEGORIES)
    .Where(DT_ID == dtid && CAT_ID == ID.Of(CATEGORIES) && PM.Of(MONEY) < 0)
    .GroupBy(CAT_ID)
    .OrderBy(Descending(SqlId("val")));
```

Just add Descending to OrderBy
