Does Ultimate++ continue to support Ole/Ctrl/Calc and Ole/Ctrl as of this version?

If so, maybe I am making some kind of mistake when I tried to compile this, as it fails for me, with this:

C:\devupp\uppsrc\Ole\Ctrl\Calc\calc.cpp(2) : fatal error C1083: Cannot open include file: 'TCtrlLib/Calc/TCtrlLibCalc.h': No such file or directory

This also fails to compile for 2007.1, although for different reasons.

If this is no longer supported, perhaps we should remove it from distribution prior to another release of Ultimate++.
