1. Why uvs2 is not shipped with upp installation package, not on upp sourceforge, not on U++
webpages (or am I blind?) ?

Because we are feeling guilty about it...

Quote:
2. how much does uvs2 compare to git (or needs changes to be better)?

Not much. Solves problem of sharing sources between a low number of very active developers
that only have ftp server...

Quote:
3. what would be needed to use uvs2 for a "distributed system" (only setup FTP servers and
exchange settings)?

A start from the scratch IMO.

Mirek

P.S.: Welcome back again
