sergeynikitin wrote on Fri, 25 January 2008 01:42I found One small error in SQLApp.

In file book.cpp, line 35, I change

```
SQL * dlg.ctrls.Update(BOOK);
```

with code

```
SQL * dlg.ctrls.Update(BOOK).Where(ID == q);
```

Without this, I can't be able to change BOOK table.

Thanks.

You have found a bug. Thanks.

Mirek
