You are so quick in answers  
I was late deleting "In a whole debugging works strange under FreeBSD"....

The same "strange" thing I have found now on Linux.

May its because I have done wrong installation steps.  
I have made a link /home/user/upp to the folder '/somewhere/upp602rc' where the upp source distribution was extracted.

The problem is that I think that ide is confused with files /home/user/upp/.../anyfile1.cpp and /somewhere/upp602rc/.../anyfile1.cpp
