Hello!

How to send broadcast message for all computers of local network?

Example:

Work good

```
String host = "192.168.0.11";
```

```
ClientSocket(sock, host, _port, true, NULL, 5, false));
```

but

```
String host = "255.255.255.255";
```

```
ClientSocket(sock, host, _port, true, NULL, 5, false));
```

broadcast not work.

Thanks!
