bonami wrote on Sun, 03 February 2008 02:29 class Bonjour : public

WithBonjourLayout<TopWindow> {

...

MenuBar menu;

...};

void Bonjour::Menu(Bar& bar)

{

menu.Add("File", THISBACK(FileMenu));

/\* This is the top level menu. i cannot open File menu by Alt+F, though the menu name shows an underlined F.

if i implement this using bool HotKey(dword), i still cannot activate all menus by Alt, which is Window's windows' behavior \*/

menu.GapRight();

menu.Add("Help", THISBACK(HelpMenu));

}

Do you overload "HotKey"? If yes, do you call TopWindow::HotKey at the end?

If either is not true, send a testcase, can be anything...

(FYI, just tested with UWord, it works -> problem likely is not with U++....)
