Hi Mirek.
One more error in SQLApp.
In file query.cpp.

When we enter dates, then different dates format is used in SQL and in screen vars
borrowed_from and borrowed_to.

in SQL - number of day from 1/1/1970 and in vars - in other format.

Therefore, if you really try, you will not succeed.

Sorry that I twisted for this example.

(I am trying to understand the code and do not understand. Nested see in the screen. Finally I
understood it - there is a mistake!!!)
