Subject: RichEdit page size
Posted by kretol on Mon, 04 Feb 2008 18:06:12 GMT

In RichEdit's constructor page size is set to Size(3968, 6074)
and unit to UNIT_POINT.
When saving to pdf ,a pdf document is 8,5x11 inch.
How and when is it calculated ? (3968 / 72 != 8,5)
How to set the page size to different sizes in inches, cm, etc. ?

Sorry if I am missing something obvious here,but could someone enlighten me, please?

Thanks in advance,
Wiktor
