Yes, I use

```
//in main section
```

```
BasePath = "App/help";
```

```
...
```

```
//in help section
```

```
String s = String(BasePath + "/" + FileTopic + "$"+  
String(ToLower(LNGAsText(GetCurrentLanguage())& 0xffff))));
```

```
....
```

```
//Execute Help section
```

```
dlg.GoTo(s);  
dlg.Execute();
```
