---

```
#include <Core/Core.h>

using namespace Upp;

#define DLLFILENAME "QrsOne_500sps.dll"
#define DLIMODULE  QRSONE_500SPS
#define DLIHEADER  <BeatPickerTest/BeatPickerTest.dli>
//#define DLLCALL  LNPUBLIC

#include <Core/dli.h>

CONSOLE_APP_MAIN
{

}
```

(LNPUBLIC is not defined at that point, I guess you will have to add the definition, or maybe it will work without it....)

Mirek
