Mirek, I've try to translate my small test program to 6 language. I found some trouble with internationalization.

Tr file contain only system messages, and NOT contain any standards string, are needed to quick translation.

I suggest: Include to pseudo package l18n sample user program with standard element of interface, like "File" "Exit" "Options"

"Edit" "Cut" "Paste" "Help" "Search" "Replace" "Open" "Save"...  
and so on.

Thanks.
