sergeynikitin wrote on Fri, 08 February 2008 16:46Mirek, I've try to translate my small test program to 6 language. I found some trouble with internationalization. Tr file contain only system messages, and NOT contain any standards string, are needed to quick translation.

*.tr files are for running time translation. If you want your app to get translated and translation included in executable you must us a *.t file. it works for me very well.
