OK, I have a fresh one now.
The only problem is, that importing doesn't overwrite existing translations.
So in Core.t, you have to fix these by hand, I think:

```
T_("date\vsu")  
huHU("Vas")
```

and

```
T_("date\vsA")  
huHU("Szo")
```

Sorry, I swapped these two translations in my previous update.

Thanks.
