luzr wrote on Mon, 11 February 2008 08:27OK, does this sound better?

```
case DATE_V:  
    if(text.IsEmpty()) return (Date) Null;  
    s = StrToDate(date, text);  
    if(s)  
        for(;;) {  
            if(IsDigit(*s))  
                break;  
            if(*s == '\0')  
                return date;  
            s++;  
        }  
    return ErrorValue(t_("Invalid date !));
```

Yes, thanks.
