In 2008.1beta I had similar problem. The size of tree node is wrongly calculated when there is only Ctrl (and no Value) in node. The things were changed somewhere between 709.dev1 and 2008.1beta. Last week I've just fixed it for my purposes in my uppsrc (I'm sorry for not providing the bug report yet), but I have focused only on the way how I am using the component. I vote for fixing the problem in official sources by the author of the changes
I attach TreeCtrl.cpp and TreeCtrl.h for 2008.1beta fixing mine problems.

Gabi
