DoggyDog wrote on Thu, 14 February 2008 13:15... Single<>. Could you give me a short explanation?

"Single" is an Ultimate++ way to do jobs which are normally done by use of the singleton pattern. If you don't know what that means, just search the internet for "singleton". A good starting point to read might be [http://en.wikipedia.org/wiki/Singleton\\_pattern](http://en.wikipedia.org/wiki/Singleton_pattern).

Werner
