Shouldn't it read

```
FontDisplay FontDisplay::BoldItalic(GuiFont().Bold().Italic());
```

instead of

```
FontDisplay FontDisplay::BoldItalic(GuiFont().Italic().Underline());
```

?

Furthermore - just for "cosmetic" reasons - I'd suggest to name the classes "ColoredDisplay" and "FontColorDisplay" uniformly either "ColorDisplay" & "FontColorDisplay" or "ColoredDisplay" & "FontColoredDisplay".

Werner
