Subject: New install - can't find cc1plus

Hi,

A newbie here. Just installed the IDE (2007.1 with mingw), put in a starting little program, and tried to compile. The error message I get is

c++.exe: installation problem, cannot exec `cc1plus': No such file or directory

The file exists in mingw/libexec/gcc/mingw32.

Am I missing something in the installation? Something I am supposed to do to set up?

My package is set to GUI DLL, and the build is MINGW Debug.

Thanks,
brew
