I tried to compile SVN rev157 under FreeBSD and fixed some minor errors, but I got stuck with a missing call to MoveEnd():

/home/masu/upp\_uv/bazaar/DockCtrl/DockWindow.cpp: In member function 'virtual void DockWindow::EventPr

oc(Upp::Ctrl::XWindow&, XEvent\*)':

/home/masu/upp\_uv/bazaar/DockCtrl/DockWindow.cpp:184: error: 'MoveEnd' was not declared in this scope

DockableCtrl.cpp

/home/masu/upp\_uv/bazaar/DockCtrl/DockableCtrl.cpp: In member function 'void

DockableCtrl::StartWindow

Drag()':

/home/masu/upp\_uv/bazaar/DockCtrl/DockableCtrl.cpp:263: error: 'p' was not declared in this scope

I could not find this function inside project sources, but there is one in James' Docking package. Did you forget this one?

Matthias
