Subject: [SOLVED] Maybe a bug... ?
Posted by mdelfede on Sun, 24 Feb 2008 16:25:13 GMT

Running a program, today I stubled on a strange behaviour.
That happens resizing main window... here the screenshot.

When I resize, the blue transparent background appears and freezes suddenly; I can move the
window but the blue background stays there.... if I minimize or maximize app, it disappears.
When the bluie background is there I can't resize window anymore.

Ciao

Max
