Yes, no problem under XP. Just Vista.

Well, it seems to be Vista bug:

 http://blogs.msdn.com/shawnste/archive/2007/03/19/some-keybo
ards-fail-with-ansi-applications-on-windows-vista-rtm.aspx

Unfortunately, U++ still tries to support Win98.... so in principle, it is ANSI app (OTOH it uses
Unicode windows, so I am not quite sure if this Vista bug is related, but seems so).
