---

I am currently working with a DropDownList and whilst I can add items of the form

```
m_drop.Add(key,value);
```

there does not appear to be a function for

```
m_drop.SetCurrentKey(key);
```

as an alternative to

```
m_drop.SetIndex(index);
```

Keys are great for adding and retrieving data but it would also be handy to be able to do everything with keys. I worked around this for now so its just a suggestion.

Nick
