---

How i can read formatted data, like:

1 2 1.2

without defined separators, from a stringstream class variable, ala STL, like:

```
stringstream dummy;
```

```
string strline;
```

```
int i,j;
```

```
float x;
```

```
dummy.str(strline);
```

```
dummy >> i >> j >> x;
```

Thanx!
