SVN revision 180.

1) Borland C++ Builder 2007

[upp\\_ws\\_base\\_ide\\_bcb2007.tar.gz](#) : base + ide (03/05/08)

You will need to apply a patch to the official source code in order to build UPP using these project files.

I do not have access to BCB2007, so, I had no chance to check these project files myself.
