I have adjusted numbers in U++ vs C++ std:: benchmarks

[http://www.ultimatepp.org/www\\$upweb\\$vsstd\\$en-us.html](http://www.ultimatepp.org/www$upweb$vsstd$en-us.html)

and also created a new one, this time comparing C++ with D:

[http://www.ultimatepp.org/www\\$upweb\\$vsd\\$en-us.html](http://www.ultimatepp.org/www$upweb$vsd$en-us.html)

Almost 5 times faster than GCC's std:: implementation in supposedly I/O limited benchmark and 70% faster than D... not bad

I guess we are now finally approaching the "physical limits of silicon"
