iplayfast wrote on Mon, 06 March 2006 01:41I'm playing with this code, and the program stopped showing the buttons that are on the layout form.

Is there a way to toggle between the layout display and the text file?

I've uploaded a copy of the layout file. Is it corrupted?

Edit I found my problem. I wasn't calling   CtrlLayout(*this, "");

BTW, I have seen "OK" variable name in the layout, better use "ok" so that you can use CtrlLayoutOK...
