unodgs wrote on Sun, 16 March 2008 16:12I think default row height of array ctrl should be bigger. In gridctrl it is `Draw::GetStdFontCy() + 5` (and header height is row height + 2). But I'm not sure if they're exactly the same values as in xp or vista. Current height of arrayctrl row is clearly too small (for example edit controls are flattened a little bit - see build menu in the ide).

Eh, actually, I was addressing KDE issues, do you too?

Mirek
