Thanks for the report!

This is a quick fix, to be applied to

`uppsrc/CtrlLib/TreeCtrl.cpp#383:`

change

`sb.SetTotal(treesize);`

to

```
if(treesize != sb.GetTotal()) {  
    sb.SetTotal(treesize);  
    Refresh();  
}
```

Regards

Tomas

P.S. Some other fixes have taken place recently in `TreeCtrl.cpp`. However, the above is the only occurrence of `sb.SetTotal` in the whole file. Alternatively I'm enclosing my up-to-date `TreeCtrl.cpp` you should be able to use as a replacement for yours. Unfortunately you would also have to update the header file.
