Hello Matthias,

Thanks for your hint. The include is fine now, but still it does not find the SDL.dll. I have tried different versions of the path, asC:/upp/sdl/lib/sdl.dll

-IC:/upp/sdl/lib/sdl.dll

-LC:/upp/sdl/lib/sdl.dll

(as -L is known from command line)

Apart of the "link options" I have also tried to add it at "libraries", but did not help. The log's return is still the same.

kindly

amando
